

Leaders Forum 2017

On Monday the 20th of February, 12 talented students went to the Leaders Forum to showcase their coding skills using a Micro: bit. A Micro: bit is a small, digital interface that students use to write programmes. The code that they write is then transferred onto the Micro: bit for all to see. The students spoke to various principals around Western Australia about the activities that they developed, including a pedometer, music-maker, random dice generator and word scroller. What was most impressive was how well spoken the students were, being able to provide quality explanations to how their programme worked. A thank you must go to Mrs Samantha Rock and Mrs Rebecca Richardson for driving the students to and from the venue.
